Consultants and customers
speak up about what makes
Second Nature so special.

I just wanted to tell you about a little success that happened yesterday. One gal who came to one of my earlier shows, does Laser therapy (to remove facial /body/ hairs) and was so pleased to find that the aloe vera cream was the perfect relief for her laser customers after their treatment. She bought some aloe samples from me to hand out to her customers, and yesterday I had my first call from her customer to order some aloe vera...and she lives in a city about 50 miles from here. Isn't that wonderful?

So this may be another market for consultants to tap into if they have laser therapists in their area.

Thanks once again for the perfect products!

Cheerio from my world and my garden..Bea #202
